What's the AMA Manual of Style anyway? History

- First edition of an editoral manual for the AMA's scientific journals appeared in October 1962 for in-house use and authors
- Seventh edition published in 1981 entitled Manual for Authors & Editors and published by an outside publisher
- Eighth edition current approach of committee of 10 professional editors from the staff of JAMA and the Archives Journals responsible for content with peer review on all sections, published in 1989
- Tenth edition published in 2007 by Oxford University Press, now 1032 pages
- Eleventh edition, now 1200 pages, published in 2020 with simultaneous online edition

Use of AI and language models in the writing of manuscripts

Author responsibilities (5.1.12)

- Nonhuman artificial intelligence, language models, machine learning, or similar technologies do not qualify for authorship.
- If these models or tools are used to create content or assist with writing or manuscript preparation, authors must take responsibility for the integrity of the content generated by these tools. Authors should report the use of artificial intelligence, language models, machine learning, or similar technologies to create content or assist with writing or editing of manuscripts in the Acknowledgment section or the Methods section if this is part of formal research design or methods.
- This should include a description of the content that was created or edited and the name of the language model or tool, version and extension numbers, and manufacturer. (Note: this does not include basic tools for checking grammar, spelling, references, etc.)

Use of AI and language models in the writing of manuscripts

Reproduced and Re-created Material

The submission and publication of content created by artificial intelligence, language models, machine learning, or similar technologies is discouraged, unless part of formal research design or methods, and is not permitted without clear description of the content that was created and the name of the model or tool, version and extension numbers, and manufacturer. Authors must take responsibility for the integrity of the content generated by these models and tools.

Use of AI and language models in the writing of manuscripts

Image Integrity

The submission and publication of images created by artificial intelligence, machine learning tools, or similar technologies is discouraged, unless part of formal research design or methods, and is not permitted without clear description of the content that was created and the name of the model or tool, version and extension numbers, and manufacturer. Authors must take responsibility for the integrity of the content generated by these models and tools.

CORRECT AND PREFERRED USAGE

Chapter 11

INCLUSIVE LANGUAGE RACE AND ETHNICITY
